

Abstract

Project Name : Development Projects to Develop the Ability of Students in Creating a Web Site
Researcher : Mr.Suchat phoolpasee
Educational institution : Sa–Nguen Ying school, Maung, Suphanburi
Academic Year : 2013

The purpose of research is as follows: 1. To create and evaluate efficiency for supplementary sheet to create efficiency criteria Of 80 /80 standard. 2. To study the learning achievement by the aid of supplementary sheet before and after the studying. 3. Study ability to create web- site of the students taught by supplementary sheet before and after the studying and 4. To study satisfaction of the students toward the supplementary sheet.

The sample of this research were 38 fourth grade students of Sa–Nguen Ying school, Maung, Suphanburi province who were studying that web site create in career and technology subject in the first semester of the academic year 2013 and take the time for 18 periods of 50 minutes and tryout by the simple random sampling.

The research instruments used were: supplementary sheet, achievement test, ability test, lesson plan and a questionnaire used asking the students' satisfaction. The t - test dependent was used to compare achievement scores before and after being taught by supplementary sheet.

The results of this research were as follow:

1. Efficiency of supplementary sheet was 86.49/99.15
2. The achievement scores of the students after being taught by Supplementary sheet was statistically significantly higher than before being taught at the 0.5 level.
3. The achievement of ability to create websites of the students after being taught by supplementary sheet was statistically significantly higher than before being taught at the 0.5 level.
4. The satisfaction of the fourth grade students toward that supplementary sheet were at a high agreement level with an average between 4.37 to 4.92.
